About Me

Data Engineer & Data Analytics Expert with 6+ years across global companies (STMicroelectronics, IBM, Leonardo). I design and ship ETL pipelines, cloud data platforms and BI solutions on PySpark, Azure, Databricks, Microsoft Fabric and Google Cloud — turning raw data into business decisions, with a Corporate Finance (MSc) lens on every pipeline.

Core Skills

Languages: Python, SQL, PL/SQL, R, KQL, Bash

Data Engineering: PySpark, ETL/ELT, Databricks, Data Pipelines, Data Modeling, Data Migration, Data Validation

BI & Analytics: Microsoft Power BI, DAX, Microsoft Fabric, Dashboarding, Data Visualization

Cloud & Infrastructure: Microsoft Azure, Google Cloud, Linux, Docker, Deployment

Machine Learning: ML Models, Predictive Analytics, Statistical Modeling, LangChain, Prompt Engineering

Management: Project Management, Team Leadership, Agile/Scrum, Risk & Change Management

Experience

Data Engineer — Leonardo

Oct 2025 – Present · Italy

- Build ETL pipelines in PySpark on Databricks and Microsoft Fabric, automating enterprise reporting and improving data quality for business analytics.

Data Engineer / Project Manager — STMicroelectronics

Aug 2022 – Oct 2025 · Italy (global, Asia projects)

- Designed and shipped ETL pipelines in Python on Databricks, automating reporting flows and improving data accuracy across multi-departmental teams.
- Built Power BI dashboards surfacing KPIs to senior management, enabling faster, data-driven decisions across the organisation.
- Led cross-functional teams as Work Package Leader for cloud infrastructure and data provisioning in Asia, delivering complex initiatives on time.
- Owned project planning, risk and change control, keeping multiple data initiatives within scope, budget and quality targets.

Data Engineer — IBM

Jul 2021 – Aug 2022 · Italy

- Optimised ETL processes, improving BI accuracy and cutting reporting turnaround for stakeholders.
- Developed and deployed data pipelines on Azure, improving data accessibility and reliability for the business.
- Wrote Python scripts for exploratory analysis and automated validation, reducing manual QA effort.
- Created Power BI dashboards that translated raw data into actionable insight for stakeholders.

Data Analyst — Adora Ict S.r.l.

Jan 2021 – Jul 2021 · Italy

- Modelled and analysed data with Python, SQL and R to support internal reporting and revenue assurance.
- Automated PL/SQL processes, cutting task completion time from 3 days to 1 day and raising operational efficiency.

Credit Advisor — Credipass

Jan 2018 – Dec 2020 · Italy

- Built and managed a client portfolio through real-estate partnerships, growing lending and insurance business.
- Performed credit-worthiness and financial analysis to assess loan and mortgage eligibility, optimising liquidity and credit-risk exposure.
- Prepared financial reports on liquidity and credit-risk performance to support internal decisions.

Education

MSc, Corporate Finance — University of Catania, Italy

Thesis: Portfolio optimization and risk reduction (Ledoit-Wolf covariance shrinkage, implemented in R). Subjects: Financial Modeling, Econometrics, Quantitative Methods, Risk Analysis, Business Valuation.

BSc, Business Administration — University of Catania, Italy

Subjects: Economics, Accounting, Business Management, Financial Mathematics, Statistics, Corporate Finance.

Professional Course: Data Science & Machine Learning — Tree School

Python for Data Analysis, Machine Learning and Statistical Modeling, supervised/unsupervised learning, predictive analytics.

Certifications

Microsoft Fabric Analytics Engineer Associate (2026) · Microsoft Azure Fundamentals AZ-900 (2021) · Databricks Lakehouse Fundamentals (2023) · Power BI Data Modeling with DAX (2025) · Python, Bash and SQL Essentials for Data Engineering — Coursera (2023) · Prompt Engineering with LangChain (2024) · Scrum: The Basics (2024)

Languages & Hobbies

Languages: Italian (native) · English (professional)

Hobbies: reading (The Art of War — Sun Tzu), AI & data engineering, continuous learning.

I authorize the processing of my personal data pursuant to Legislative Decree No. 196/2003 and the GDPR (EU Regulation 2016/679).
