

Francesco Ardita

Data Engineer & Data Analytics Expert

Italy · remote / hybrid / onsite · [linkedin.com/in/francesco-ardita](https://www.linkedin.com/in/francesco-ardita) · github.com/fardita

Profile

Data Engineer and Data Analytics Expert with experience in global companies (STMicroelectronics, IBM, Leonardo) designing ETL pipelines, data models and cloud analytics solutions on Azure, Databricks, Microsoft Fabric and Google Cloud. I combine strong technical skills (Python, SQL, Power BI, Machine Learning) with a quantitative background in Corporate Finance, leading data integration, BI dashboards and cross-functional teams to improve decision-making. Hands-on with infrastructure and deployment (Linux, Docker, data migrations).

Key Skills

Languages: Python, SQL, PL/SQL, R, KQL, Bash

Data Engineering: Data Modeling, Data Pipelines, Databricks, Data Migration, Data Validation, PySpark

BI & Analytics: Microsoft Power BI, DAX, Microsoft Fabric, Dashboarding, Data Visualization

Cloud & Infra: Microsoft Azure, Google Cloud, Linux, Docker, Deployment

Machine Learning: Predictive Analytics, Statistical Modeling, LangChain, Prompt Engineering

Projects & Team: Project Management, Team Leadership, Agile/Scrum, Risk & Change Management

Experience

Data Engineer — Leonardo

Oct 2025 – Present

Italy Designing and building enterprise ETL pipelines in PySpark on Databricks and Microsoft Fabric.

Data Engineer / Project Manager — STMicroelectronics

Aug 2022 – Oct 2025

Italy (global, Asia projects) ETL pipelines in Python on Databricks, improving data accuracy and automating reporting flows.

- Power BI dashboards for multi-departmental KPIs and business decisions.
- Led cross-functional teams as Work Package Leader for cloud infrastructure and data provisioning in Asia.
- Oversaw project planning, risk and change control, ensuring timely delivery of complex data initiatives.
- Partnered with senior management to align analytics strategy with business goals.

Data Engineer — IBM

Jul 2021 – Aug 2022

Italy Optimized ETL processes for accurate, timely business intelligence reporting.

- Developed and deployed data pipelines on Azure, improving data accessibility and reliability.
- Built Python scripts for exploratory data analysis and automated validation.
- Created Power BI dashboards delivering actionable insights to stakeholders.

Data Analyst — Adora Ict S.r.l.

Jan 2021 – Jul 2021

Italy Acquired, processed and modeled data with Python, SQL and R.

- Built PL/SQL automation scripts cutting task completion from 3 days to 1 day.
- Created analytical dashboards for internal reporting and revenue assurance programs.

Credit Advisor — Credipass

Jan 2018 – Dec 2020

Italy Developed and managed a client portfolio through real-estate agency partnerships.

- Performed financial and credit-worthiness analysis for loan and mortgage eligibility.
- Prepared financial reports on liquidity and credit-risk performance.

Education & Certifications

• Master's Degree in Corporate Finance — University of Catania, Italy

• Bachelor's Degree in Business Administration — University of Catania, Italy

• Professional Course in Data Science & Machine Learning — Tree School

• Microsoft Certified: Fabric Analytics Engineer Associate (2026) · Databricks Lakehouse Fundamentals (2023)

• Microsoft Azure Fundamentals AZ-900 (2021) · Power BI Data Modeling with DAX (2025)

• Python, Bash and SQL Essentials for Data Engineering (Coursera, 2023) · Prompt Engineering with LangChain (2024)

Projects

• COVID-19 impact on daily landings in Italy & Greece — UNHCR dataset analysis with R and polynomial regression.

• Mathematical models for financial markets — efficient frontier, Sharpe index, covariance matrix on 25 US stocks.

• Business Valuation British American Tobacco (BAT) — Discounted Cash Flow (DCF) and relative/intrinsic valuation.
